Hive Project 1

```
beeline -u jdbc:hive2://HiveServer2:10000 -n hadoop
beeline -u "jdbc:hive2://HiveServer2:10000" -e "SHOW DATABASES"

docker cp Master1:/usr/local/hive/conf/hive-default.xml.template .
```

```sql
CREATE DATABASE DB;

-- Create extremely simple customers table
CREATE TABLE customers (
    customer_id INT,
    first_name STRING,
    last_name STRING,
    email STRING,
    phone STRING
);
--------------------------------------------------------------------------
INSERT INTO TABLE customers VALUES (1, 'John', 'Smith',
'john.smith@example.com', '555-123-4567');
INSERT INTO TABLE customers VALUES (2, 'Emily', 'Johnson',
'emily.j@example.com', '555-234-5678');
INSERT INTO TABLE customers VALUES (3, 'Michael', 'Williams',
'michael.w@example.com', '555-345-6789');
```
